

# HANDS-ONLY CPR

YOU CAN  
**SAVE**  
A LIFE

**NO MOUTH-TO-MOUTH. JUST PUSH HARD AND FAST.**

For teens and adults (ages 12 and older) who suddenly collapse and don't respond.

**1**

## CHECK. CALL. CARE.

-  Tap the person and shout, "Are you okay?"
-  No response and not breathing normally?
-  **Call 911 right away** or ask someone to call.
-  Send someone to get an AED (Automated External Defibrillator) if one is nearby.

**2**

## PUSH HARD & FAST.

-  Place the heel of one hand in the center of the chest (lower half of the breastbone).
-  Place your other hand on top and interlock your fingers.
-  **Keep your arms straight** and shoulders over your hands.

**3**

## KEEP GOING.

-  **Push hard and fast.**  
Rate: 100–120 compressions per minute (about the beat of "Stayin' Alive")
-  **Push deep:** at least 2 inches (5 cm).
-  **Let the chest come all the way up** between each push.
-  **Minimize pauses.** Every second counts.

### KEEP GOING UNTIL:

- ✓ EMS arrives and takes over
- ✓ An AED is ready to use
- ✓ The person shows signs of life
- ✓ You are physically unable to continue

**BE PREPARED. BE CONFIDENT. YOU CAN SAVE A LIFE.**
